

# Safety Moment: Cold Storage Safety

- Standard refrigerators should not be used for storage of flammable or reactive chemicals.
- Electrical connections within the refrigerator can be an ignition source for flammable vapors.
- Instead use Flammable material or Explosion proof Fridges/Freezers
- NO FOOD OR DRINK!!!

# Safety Moment: Cold Storage Safety

- Frost-free refrigerators should also be avoided.
- Materials should be labeled with the contents, owner, date
- Make a plan in event of a power outage
- Defrost 1-2 times per year
